SUMMARY

I design and build complete digital systems: websites, backend workflows, APIs, student portals, business platforms, and SEO-ready web experiences for clients in Cameroon and remote global markets.

PROFESSIONAL PROFILE

Full Stack Developer and founder of ENJEBEL TECH, a remote-ready software company based in Douala, Cameroon and serving clients worldwide. I build responsive websites, backend systems, mobile-first experiences, API-driven platforms, SEO-ready business websites, and practical software solutions.

Open to remote, part-time, and full-time positions, with proven ability to work in startup and team environments.
